

REPORTS TAB

We use a `jqxExpander` to display `ReportJSON`, `UserJSON` and notes.

Load Report - Uses existing Load Report popup window. Before showing it, we check if report is changed and offer users to save the report first.

"The report may have been changed. If you load a new report you may lose these changes. Do you want to lose any changes? [Yes/No]"

If user selects yes, we show load report popup.

SAVE REPORT

Save Report will open a popup window with "Save" and "Cancel" buttons.

User can edit report name and Locked checkbox (ONLY if he is the creator/owner) or else these fields are read only.

If the "Create a Copy" checkbox is selected, we treat as Clone record – add (+ "(Copy)") to name.

Mockup of the save report window

Report ID: 3AZ Locked: ☐

Name:

☐ Create a copy

If you save an existing report it will be overwritten and the original lost. You can create a copy of the original using the "Create a copy" checkbox above.

Save Cancel

JQXComboBox

- Displays reports on server
- Resizes with window resize
- Window resizes vertically only
- Set minimum form height

User can edit report name and Locked checkbox if "Make a Copy" checkbox is checked AND he is the owner.

Save JSON & Load JSON buttons

Are moved to right and use images not text. They will need mouseover hints.

Save the data below as a JSON report file (*.SJR)" "Load a saved JSON report file (*.SJR)"

but they save ReportJSON, UserJSON and notes in a JSON file with 3 sections

"ReportJSON": {}

"UserJSON": {}

"Notes": {}

When reading a SJR file, validate that one of these fields exist.

UserJSON and ReportJSON must use different JSON colour scheme .

If Allow Edit is ON (we need to check URN and Locked allow it) , Report JSON, User JSON and notes can be edited. We need to set a Changed Flag so we can warn user if changes are not saved if he changes pages or tries to load a new report.

Changing pages

Before following link, we check if report is changed and offer users to save the report first.

RESULT TAB

Change "Save JSON" button caption to "Export JSON" and use an ICON

Add refresh button on right side of toolbar.
