

## REPORTS TAB

We use a `jqxExpander` to display `ReportJSON`, `UserJSON` and notes.

**Load Report** - Uses existing Load Report popup window. Before showing it, we check if report is changed and offer users to save the report first.

"The report may have been changed. If you load a new report you may lose these changes. Do you want to lose any changes? [Yes/No]"

If user selects yes, we show load report popup.

## SAVE REPORT

Save Report will open a popup window with "Save" and "Cancel" buttons.

User can edit report name and Locked checkbox (ONLY if he is the creator/owner) or else these fields are read only.

If the "Create a Copy" checkbox is selected, we treat as Clone record – add (+ "(Copy)") to name.

Mockup of the save report window

Report ID: 3AZ Locked: ☐

Name:

☐ Create a copy

If you save an existing report it will be overwritten and the original lost. You can create a copy of the original using the "Create a copy" checkbox above.

Save Cancel

JQXComboBox

- Displays reports on server
- Resizes with window resize
- Window resizes vertically only
- Set minimum form height

User can edit report name and Locked checkbox if "Make a Copy" checkbox is checked AND he is the owner.

## Save JSON & Load JSON buttons

Are moved to right and use images not text. They will need mouseover hints.

Save the data below as a JSON report file (\*.SJR)" "Load a saved JSON report file (\*.SJR)"

but they save ReportJSON, UserJSON and notes in a JSON file with 3 sections

"ReportJSON": {}

"UserJSON": {}

"Notes": {}

When reading a SJR file, validate that one of these fields exist.

UserJSON and ReportJSON must use different JSON colour scheme .

If Allow Edit is ON (we need to check URN and Locked allow it) , Report JSON, User JSON and notes can be edited. We need to set a Changed Flag so we can warn user if changes are not saved if he changes pages or tries to load a new report.

## Changing pages

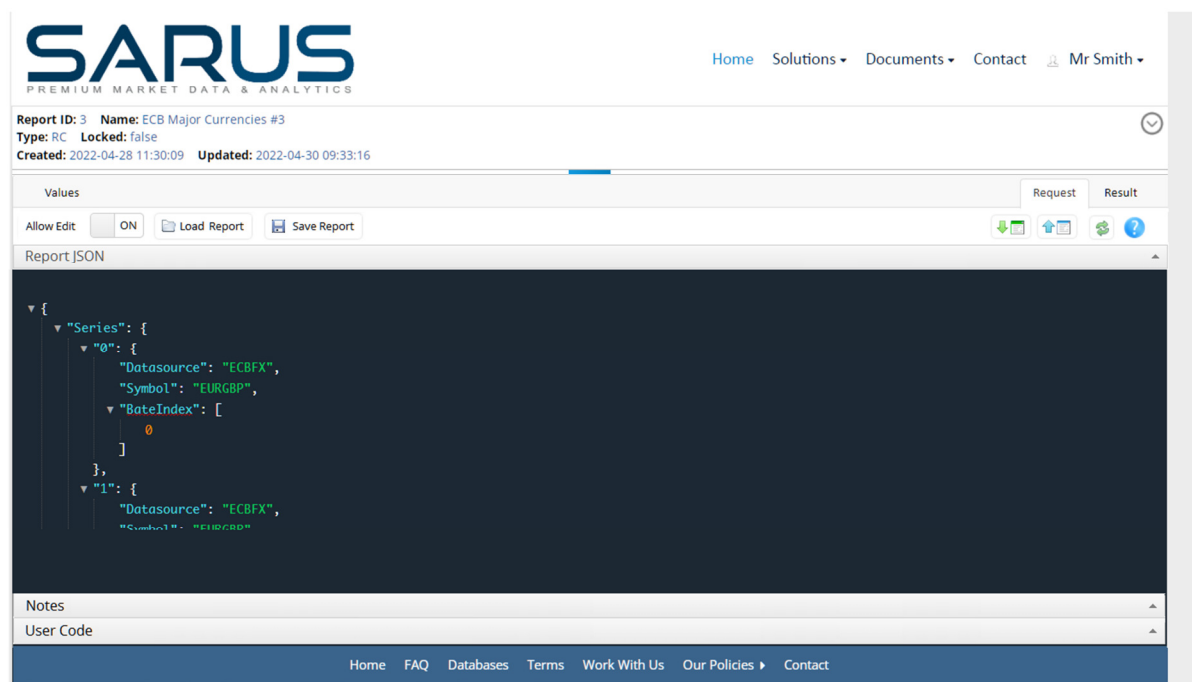

Before following link, we check if report is changed and offer users to save the report first.

## RESULT TAB

Change "Save JSON" button caption to "Export JSON" and use an ICON

Add refresh button on right side of toolbar.

## REPORTS TAB

We use a jqxExpander to display ReportJSON, UserJSON and notes.

**IF we have a report name in our current JSON record , we show it in the edit part of the JQXCombo box.**

**Load Report** - Uses existing Load Report popup window. Before showing it, we check if report is changed and offer users to save the report first.

“The report may have been changed. If you load a new report you may lose these changes.

Do you want to lose any changes? [Yes/No]

If user selects yes, we show load report popup.

## SAVE REPORT

Save Report will open a popup window with "Save" and "Cancel" buttons.

User can edit report name and Locked checkbox (ONLY if he is the creator/owner ) or else these fields are read only.

If the "Create a Copy" checkbox is selected, we treat as Clone record – add (+ "(Copy)") to name.

### When save button is clicked,

If no report selected in edit field of JQXCombobox we show messagebox "You must enter a report name to save".

If "Make a copy" is checked, make a copy of selected report in listbox (updating name field with + " (Copy)" and close save dialog. If no report in list of JQXCombobox we show a messagebox "Please select a report to copy".

If we have a report name in our JSON record **and it is the same** as in the JQXCombobox save the existing report with the JQXCombobox text name

If we have a report name in our JSON record not in the JQXCombobox list save the NEW report with the JQXCombobox text name

If we have a report name in our JSON record AND in JQXCombobox list AND it is different to selected report ask user "

You are about to overwrite a saved server report.

Do you want to continue?" [yes/no]

### Mockup of the save report window

' checkbox, and a 'Name:' label followed by a large text area. A red arrow points from the text area to the label 'JQXComboBox' on the right. Below the text area is a 'Create a copy' checkbox. At the bottom, there is a disclaimer: 'If you save an existing report it will be overwritten and the original lost. You can create a copy of the original using the "Create a copy" checkbox above.' and two buttons: 'Save' and 'Cancel'."/>

Save Server Report

Report ID: 3AZ Locked: ☐

Name:

☐ Create a copy

If you save an existing report it will be overwritten and the original lost. You can create a copy of the original using the "Create a copy" checkbox above.

Save Cancel

JQXComboBox

- Displays reports on server
- Resizes with window resize
- Window resizes vertically only
- Set minimum form height

User can edit report name and Locked checkbox if "Make a Copy" checkbox is checked AND he is the owner.
